

## KEEP UNWANTED HEAT OUT OF YOUR HOME FPL'S REFLECTIVE ROOF PROGRAM-ROOF REPLACEMENT

If you're considering or already have made the decision to install a new roof on your home, now's your chance to become more energy efficient and save money on your electric bill.

**FPL.**

POWERING TODAY. EMPOWERING TOMORROW.®

## WHY INSTALL A REFLECTIVE ROOF?

Your roof absorbs heat, which affects your home's comfort level and the amount of electricity you use. When you install an energy efficient reflective roof, you help keep unwanted heat out of your home and make it easier for your air conditioner to keep your home cool.

Light-colored roofs made of reflective materials, such as metal and cement or ceramic tile, make your home more affordable to cool during the hot summer months. Reflective roof materials that are ENERGY STAR® or Cool Roof Rating Council compliant typically reflect 65% or more of the sun's rays.

## THE PROGRAM THAT PAYS

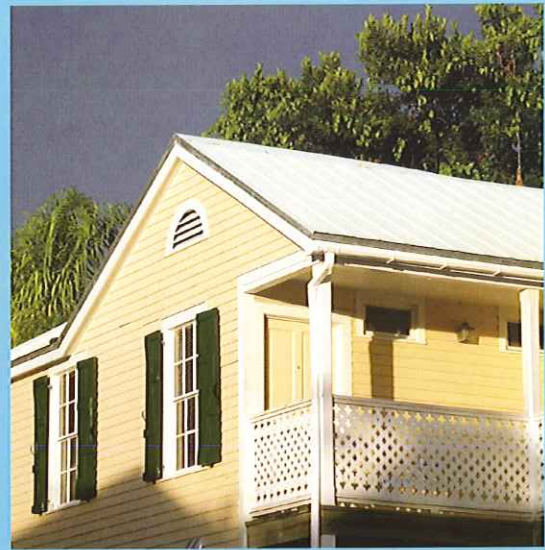

FPL can help you pay to install a new reflective roof through the FPL Building Envelope program.

REFLECTIVE ROOF INCENTIVES		
REFLECTIVE ROOF MATERIAL	SOLAR REFLECTANCE	FPL INCENTIVE
Cement or Ceramic Tile	0.73 or greater	\$325
Metal	0.65 or greater	\$325

## START SAVING TODAY

To qualify for the reflective roof incentive, just follow these simple steps:

1. Locate an FPL Reflective Roof Participating Independent Contractor, visit [www.FPL.com/contractor](http://www.FPL.com/contractor).
2. Schedule an appointment with an FPL-approved contractor you select to learn more about reflective roof replacement options.

## HITTING HOME

HERE'S AN EXAMPLE OF HOW MUCH YOU CAN SAVE BY INSTALLING A REFLECTIVE ROOF:

If you previously did not have a reflective roof on your 2,400-square-foot home and then upgraded to a reflective roof, your FPL incentive would be \$325.

And at \$0.12/kWh, your annual energy savings would be approximately \$200 per year.

These programs are subject to modification or cancellation at any time without notice. Final eligibility requirements are specified in the program standards.
